Applicant THE UNIVERSITY OF ADELAIDE et al						
1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.						
2. This REPORT consists of a total of 3						
This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).						
These annexes consist of a total	of sheet(s).					
3. This report contains indications relating	g to the following items:					
I X Basis of the report						
II Priority						
III Non-establishment of o	pinion with regard to no	velty, inventive step	and industrial applicability			
IV Lack of unity of inventi	on					
V X Reasoned statement und citations and explanation	——————————————————————————————————————					
VI Certain documents cited	d					
VII Certain defects in the international application						
VIII Certain observations or	VIII Certain observations on the international application

International application No.

PCT/AU03/00009

v.	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations
	and explanations supporting such statement

1.	Statement
1.	Statement

Novelty (N)	Claims 1-21	YES
	Claims	NO
Inventive step (IS)	Claims 1-21	YES
	Claims	NO
Industrial applicability (IA)	Claims 1-21	YES
	Claims	NO

2. Citations and explanations (Rule 70.7)

. This report has considered the following documents cited in the International Search Report:

D1 US 4490365 A

D2 US 4121904 A

Novelty and Inventive Step (Claims 1-21)

Claims 1-21 encompass a method of removing hair from live mammals, involving the steps of delivering a collagen cleaving agent beneath the surface of the skin, followed by removal of the hair.

D1 discloses a method of depilating (removal of hair) by administering epidermal growth factor or analogues thereof.

D2 discloses depilatory compositions comprising sodium thioglycolate and calcium thioglycolate for removing hair from live human skin.

In light of this, the invention defined in claims 1-21 are novel and inventive as there is no disclosure or suggestion in the prior art of the use of a collagen cleaving agent administered beneath the surface of the skin to remove hair from a live mammal.
